DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7, 8, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by

German Publication DE 198 14 304.4.

German Publication DE 198 14 304.4 discloses an electromagnetic valve (10 Teile) having a magnet armature, a core member, a valve housing with a valve coil with a valve closure member and a valve seat, wherein the valve housing has a first sleeve part portion which has a retaining collar 30, which in conjunction are seen as a preassembled module and having an undetachable connection to a second sleeve portion of a thin wall construction and receives the valve seat and has a stepped portion that accommodates a ring filter. The first sleeve is telescopically engaged over the second sleeve. The armature is a stepped piston and is between the valve seat and the core. The second sleeve is thicker than the first sleeve.

Response to Arguments

3. Applicant's arguments with respect to claims 7, 8, 10 and 12 have been considered but are moot in view of the new ground(s) of rejection. Regarding applicant's argument that the second sleeve portion is of a thin wall construction, the examiner does not give this much patentable weight as this is not a definite limitation. The examiner requests that this be more defined.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eith discloses an electromagnetic valve having a ring filter.
